

RA-X58C-WS

RG58 Coaxial Cable

Product overview

RG58 coaxial cable meets the standard: M17 / 28-rg58, maximum working frequency: dc-1ghz, RG58 / u is used to provide high-speed and high-precision data transmission, and common applications include security system, computer network, access control and home automation applications. Rg-58 coaxial cable is often used to connect wireless devices and antennas in wireless network, and is also often used in automobile harness;

Construction

Conductor	Material	Copper
	Diameter	0.5 mm \pm 0.02 mm
	Wire Gauge	24 AWG
Insulation	Material	SPE
	Diameter	3.3 mm \pm 0.3 mm
AL Foil	Construction	With Foil
	Material	APG
	Width	13 mm
	thickness	> 0.024 mm
	Overlap Rate	\geq 20%
Braid	Material	CCAM
	Braid Coverage	60% - 98%
Jacket	Material	PVC
	Diameter	5.3 mm \pm 0.3 mm

Packing

Package length	100m / 300m / 500m
	Customized
Box type	Ordinary / Waterproof
	Customized optional
